

## **NORTHERN BEACHES COUNCIL NEWPORT ACTIVATION PLAN**

The Place & Economic Development Team, in conjunction with consultants People, Place & Partnership, are currently undertaking an Activation Plan for Newport Village.

The purpose of the Activation Plan is to provide a framework for partnerships and activation of public space in these locations. This framework will be developed through a thorough assessment of the Village and consultation with the users of the space, local business and the community.

The Activation Plans will take into account the needs, wants and priorities of the community which will be gathered by a variety of methods before and during the assessment process.

The Activation Plan will build on the identified issues which have emerged during the assessment phase and will outline key priorities for activation in the village as well as establishing a framework for the development of initiatives in the short, medium and long term.

The Activation Plan for Newport is not a planning document and will not supersede the Newport Masterplan nor any other planning documents or requirements.

The activation plan will identify opportunities for council to partner with community and businesses to deliver activities and events that can contribute to increased vitality in Newport.

An action plan will be developed after consultation with business and community that will identify opportunities like events, business engagement, shop local loyalty programs, business training programs and the like.
