

Target audience	Preferred sign type / Comments	Priority
Boaters, fishers	2 x Post (60 x 40cm). Does post version also come in 110x75cm? Busy boat ramp - could do with sign at top of each ramp = 2 signs (if sacrifice some of low priority sites). At southern ramp it could be placed between boat ramp and fish cleaning table. At northern ramp place the post to north of pontoon gangway - then it might also be viewed by dogwalkers. Another option could be table top in picnic area between the two ramps.	1
Boaters, fishers, swimmers	Station Beach. 2 signs a possibility? (1) 1 table top (110 x 75) near the boathouse - get a lot traffic from swimmers, people hiring boats and boaters coming ashore to access beach or café. (2) Sign post (110 x 75) at boat ramp. Not a high use boat ramp but do get jet skis launching that churn up seagrass - be good to try and reach these people.	1
Boaters, fishers	Post (110 x 75cm). Position just above boat ramp slope on south side. Get beachgoers and users of boat ramp. Good location because increasing commercial use by barges and popular for local boaters that don't want to have to go Bayview boat ramp.	1
Boaters, fishers	Tabletop (110 x 75cm). Position in BBQ/picnic area - high use by swimmers, dinghy storage (for boaters accessing moorings) or boaters that come ashore on day trips. Boat ramp itself is just access to beach launching - has limited parking and low use - I wouldn't put the sign there.	2
Boaters, fishers	Tabletop (110 x 75cm) . Location in courtyard @ seawall edge between the two wharfs. Get commuter traffic - although mainly residents travelling to and from Scotland Island. Two boatramps (off the carpark) that are non-functional - blocked with rocks or bollards. Car park for residents and smaller boats often anchored or tethered along beach/rock revetment. No good locations in sign at car park that would get good foottraffic.	3
Boaters, fishers	Post (60 x 40cm). Best location on walkway just prior to wharf. If on wharf might get in way of unloading. Not high traffic. Dinghy storage and number of dinghy/smaller boats anchored/tethered here - target audience boaters that use dinghy's to access vessels on moorings. Private property.	4
Boaters, fishers	Lowest priority. Private marina and small café and shipwright and refueling. Limited boating audience. Private land.	5
swimmers, snorkellers, divers, fishers, paddlers, boaters	Engagement with NPWS required.	TBD
